

# F-Gas & ODS Regulations (Category IV) Leakage Checking - City & Guilds (2079-14)

## Course Aim

This industry leading course will provide delegates with the knowledge required to leak check refrigerated systems that use fluorinated and ozone depleting gases.

The course meets the requirements under the Fluorinated Greenhouse Gases Regulations 2009.

## Who Should Attend?

Those engineers who are looking to only leak check refrigeration, air conditioning and heat pump systems. You need this qualification as a licence to practice with fluorinated gases and ozone depleting substances in accordance with the regulations.

### Pre-Requisites

This is a qualification designed for experienced workers, it is not an entry level qualification. To ensure the delegate has the potential to successfully gain the qualification, it is recommended that delegates have an existing relevant qualification or possess significant knowledge and experience in the sector, prior to attending.

## Course Duration

This is a 2 day course

## Agenda

- Introduction
- Health & Safety requirements
- Regulations & legislation
- Safe handling of refrigerants
- Refrigerant properties
- Record keeping
- Refrigerant and AC systems
- System efficiency
- Measuring System Performance
- Leak testing
- Theory & practical assessments

## Certification

On successful completion of the course, a Level 2 award in F-Gas and Ozone-Depleting Substances (ODS) Regulations - Category IV - City and Guilds 2079-14 certificate will be issued, qualifying you to undertake leak checking of equipment containing F-Gas refrigerants.
